

ATLAS TRANSFER TROLLEY

Functionality

Cleaning

- SB satin AISI304L stainless steel structure, with Polyamide/Polyurethane wheels (including motorized) for use in pharmaceutical environments

Handling

- Full control of the lifter thanks to the position and alignment quotas saved in memory

Versatility

- Lifting accessory with provision for multiple functions

Technical data

- Lifting range: 360 mm to 1150 mm
- Maximum lifting capacity: 150 kg

Features

- Push button controls on the cart pulpit.
- Central lifting column for better visibility
- Battery pack for use in pharmaceutical environments
- Sanitary industrial electrical outlet for charging the battery pack

Atlas combines robustness, hygiene and maximum operational reliability.

Smart handling, safe lifting

Atlas is the trolley/lifter designed to ensure safe, precise handling that is perfectly compatible with controlled contamination environments in the pharmaceutical industry.

A strategic solution to optimize ergonomics, safety and productivity in the clean room.

Flexibility, business continuity and full compliance with industry required standards.

Versatile and configurable with different gripping accessories, Atlas easily adapts to multiple applications: canister handling, tanks, line components or process equipment.
