

HYDRA

Peristaltic dispensers

SETIN
Equipment

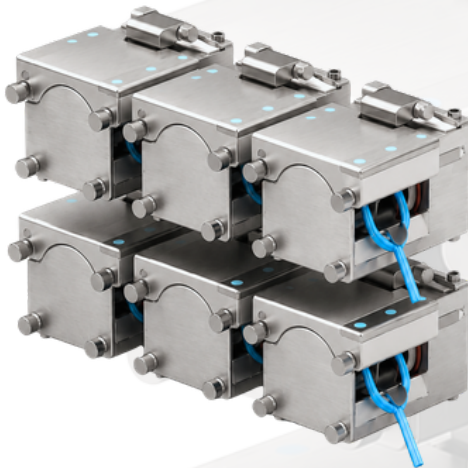

Flexibility and precision

- Dosing accuracy up to $\pm 0.5\%$
- Compatibility with tubing inner diameters from 0,5 mm to 8 mm

Safety and maximum cleanliness

- Absence of springs in contrasts
- Contrasts made of PEEK completely sanitizable

Compact design and modular installation

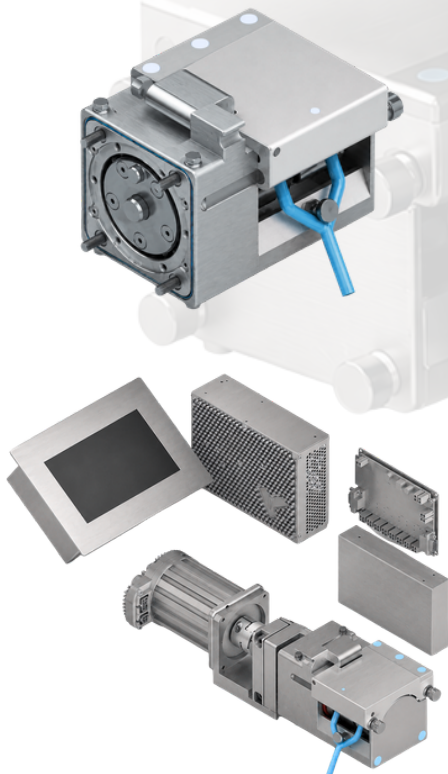

- Possibility of installation in battery without mechanical interference
- Pumps can be installed in series with a 130 mm pitch

3 construction options

- **Stainless steel** – ideal for applications with stringent hygienic requirements and production environments that demand maximum durability and long-term structural stability.
- **Aluminium** – a lighter and more cost-efficient solution, suitable for applications with moderate environmental and mechanical requirements.
- **Polyamide** – designed to deliver lightweight construction, chemical resistance and cost reduction.

Complete caseless dispenser to integrate into a filling machine

- To make easier the integration on the filling machine (adapt to revamping of mechanical filling machine), we offer a complete caseless dispenser with:
 - motors
 - controllers
 - HMI and power supplies (requires a start input signal and returns an output signal on the operating state)

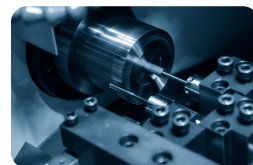

**12 months
warranty**

Additional services

**White
label**

**Custom
development**

**Diagnostics
24/7**
