

NEPTUNE ESSENTIAL

Liquid filling machine

Dimensions LxWxH

590 x 495 x 880 mm

Cleaning

- Exceptional cleaning process of our system, resulting in greater operational efficiency.

Dosage range

- Volumes ranging from 4 to 750 ml, depending on specific requirements. Possibility of using up to two dosers working in parallel.

Precision

- Dosing accuracy well below 1% for the above-mentioned dosages.

Versatility

- Possibility to dose any type of volume and fluid

Certified materials

- The materials used for the parts in contact with the product are in accordance with current regulations

Technologies

- Thanks to this volumetric doser, it's possible to dose dense fluids as creams or balsamic vinegar up to 500 ml with high precision (dosing accuracy $\pm 1\%$).

Competitive pricing

- Available at a lower price than conventional dosing systems.

Autonomous machine

- We offer a complete and autonomous version of our machine that can be easily used by the operator via panel PC.
- The machine is composed of a load cell combined with a flow control valve to measure the fluid with maximum precision.
